

# Are you sometimes quixotic?

16 de agosto de 2021

Perhaps. To be quixotic (quijotesco) means to be unrealistic or impractical.

Someone could say that you are a wishful thinker.

Here are some examples:

- Mr. Sánchez`s political aspirations are quixotic at best (...aspiraciones son quijotescas en el mejor de los casos).
- How quixotic of you! ¡Qué quijotesco de tu parte!
- Mr. Biden, the President of the United States, has a quixotic attitude to life.

The adverb is “quixotically” (de manera quijotesca o como un quijote). An example:

- Mr. Putin is behaving quixotically.

So have you sometimes been quixotic and behaved quixotically?
