

Pink

26 de agosto de 2016

Pink is a colour (rosa) and it is sometimes used to describe your cheeks - **pink** cheeks (sonrosados).

However, this article concerns “**pink**” as an idiom (modismo). Study these:

- Mr. Podemos’s Porsche is in the **pink** of condition (está en perfecto estado).
- Alejandro was *tickled pink* (estaba encantado) when Mrs. May became the British Prime Minister.
- The dish (el plato) was the **pink** of perfection (fue cocinado a la perfección).

If someone is “in the **pink**” they are in good health.

So the next time you encounter an Englishman, and they ask after your health (how are you?) your reply could be “in the **pink**”.
